National News – Significant Events

More Rain, Flooding Forecast Along Soggy East Coast

(AP) While spared the full fury of Hurricane Joaquin, parts of the East Coast saw record-setting rain Saturday that shut down roads, waterlogged crops and showed little sign of letting up. Much of the drenching was centered in the Carolinas, but coastal communities as far away as New Jersey were feeling the effects of unrelenting rainfall. Rain and flood warnings remained in effect for many parts of the East Coast through Sunday. At least five weather-related deaths have been reported. President Barack Obama declared a state of emergency in South Carolina and ordered federal aid to help state and local efforts. Three people died in three separate weather-related traffic incidents in South Carolina since the heavy rains began, the state's highway patrol said, including two motorists who lost control of their cars and a pedestrian hit by a car. Once the rain ends, the flood threat persists because the ground is too saturated to absorb water, meteorologists say. And high winds could topple trees like the one that hit a vehicle near Fayetteville, North Carolina, killing a passenger. The storm also has been linked to a drowning in Spartanburg, South Carolina. Several shelters were opened in coastal counties while health officials warned people not to swim or play in the flood waters. The South Carolina Emergency Management Division said its command center was open and running 24 hours a day for as long as the flood threat remains.

International News – Significant Events

Typhoon Roars Into South China; Tens of Thousands Evacuated

(AP) A strong typhoon roared into southern China on Sunday, bringing powerful winds and heavy rain to the region after leaving more than a dozen fishermen missing in the Philippines. Tens of thousands of people in southern China were evacuated before Typhoon Mujigae made landfall near the city of Zhanjiang in Guangdong province just after 2 p.m., according to the National Meteorological Center. The center had already issued a red alert — China's highest level of weather preparedness — warning that as much as 280 millimeters (11 inches) of rain could fall in some places from Sunday morning to Monday morning. There were no immediate reports of injuries or damage from the storm.

France Floods: Several Dead on Riviera After Storms

(AP) Violent storms and flooding have hit southeast France, killing at least 10 people with six more missing, officials said. Three elderly people drowned when their retirement home near the city of Antibes was inundated with floodwater. Another five people are reported to have died as they tried to park their cars under shelter and became trapped. French President Francois Hollande has thanked rescuers and expressed the "solidarity of the nation". He and Interior Minister Bernard Cazeneuve are due to visit the affected regions. Heavy rain hit the French Riviera, which lies on the Mediterranean coast and borders Italy, on Saturday evening. The city of Nice is estimated to have received 10% of its average yearly rainfall in two days alone. The river Brague burst its banks, sending water coursing into nearby towns and cities. Social media pictures showed water gushing down the streets of Cannes. The main motorway through the area has been closed, trains halted and hundreds of tourists sought shelter at Nice airport overnight.

SITUATION SUMMARY

Hurricane Joaquin, Atlantic Ocean – United States East Coast

- Hurricane Joaquin has **weakened to a Category 3** Hurricane on the Saffir-Simpson Hurricane Wind Scale.
- As of **0500 hours PDT**, Hurricane Joaquin was located approximately **210 miles** southwest of Bermuda moving northeast at **21 mph**. A turn toward the north-northeast is **expected later this morning, with this motion continuing through Monday**. **On the forecast track, the center of**
- **Joaquin will pass near Bermuda this afternoon**. Maximum sustained winds are **115 mph** with higher gusts. **Weakening is forecast during the next 48 hours**. Hurricane force winds extend out to **70 miles** from the center and tropical storm force winds extend out to 205 miles from the center. The minimum central pressure is **28.23 inches**.
- **A Hurricane Warning has been issued for Bermuda**. Tropical storm conditions are expected to reach Bermuda Sunday morning, with hurricane conditions expected by Sunday afternoon. **JOAQUIN is expected to produce 3 to 5 inches of rainfall over Bermuda through Monday**. Swells from JOAQUIN will affect Bermuda through Monday.
- **Swells from JOAQUIN are affecting much of the southeast coast of the U.S. and will spread northward through Sunday**. Even though Joaquin is expected to pass well east of the coast of the United States, a prolonged period of elevated water levels and large waves will affect the mid-Atlantic region, causing significant beach and dune erosion with moderate coastal flooding likely.
- **An additional 6 to 8 inches of rain is possible from coastal SC near Charleston to the midlands Sunday**. The heaviest rain will then shift to the Piedmont and foothills of North Carolina late Sunday; before taking aim at the North Carolina Coastline Monday. A high risk for flash flooding will persist through the day today, with localized flash flooding continuing into early Monday. It will take the region several days for water levels to recede following this event.
- The USCG, Navy, and Air Force are conducting a search and rescue operation for the missing U.S. flagged cargo ship, EL FARO, covering more than 30,000 miles since 1 Oct. On 3 Oct, a USCG aircraft located a life ring 138 miles northeast of Crooked Island, Bahamas that was confirmed to belong to the EL FARO. Four USCG aircraft, two Navy aircraft, and one Air Force aircraft will continue searching today. Coast Guard Cutter (CGC) NORTHLAND and CGC RESOLUTE are enroute and scheduled to be on scene by 4 Oct.
- The FEMA National Watch Center remains at Enhanced Watch (24/7). FEMA Logistics Incident Support Base teams remain deployed to MA, NC, and NJ. A State of Emergency remains in effect for SC, NC, VA, NJ, and several counties in MD. There are no known impacts to nationally significant critical infrastructure.

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Northeasterly winds will rapidly diminish this morning. Mostly clear skies and dry conditions will continue through Monday. Coastal low clouds will return by Tuesday while mostly clear skies continue inland.

Medford Weather:

Gradually weakening easterly winds will bring downslope warming to Brookings today and continued breezy conditions over the ridges and east side. There will be a change to onshore flow Monday night, with night and morning coastal low clouds expected. Increased high clouds are expected Tuesday through the end of the week due to a series of disturbances in a west-southwest flow aloft. There will also be a slight chance of near coastal light rain through the week.

Reno Weather:

Low pressure over central and southern California will bring additional showers to eastern California and western Nevada through Monday, mainly south of Highway 50. A few inches of snow are possible for Mono County above 9000 feet today. High pressure will bring drying conditions starting Monday night with afternoon highs warming to above normal by midweek.

San Francisco Weather:

An upper low will move south of the area today. Isolated showers may linger across the far southern portion of the forecast area today, otherwise dry and mild weather is expected to develop by the afternoon. Locally strong and gusty winds in the North and East Bay Hills will diminish by late morning. An upper level ridge will develop over California early in the week and then strengthen late in the week. This will result in dry conditions through next weekend, along with a warming trend beginning midweek.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

A storm moving into central and southern California today will bring cooler weather, gradual weakening of winds, and diminishing chances of showers and thunderstorms today. Showers may linger into Monday over the Sierra Nevada south of Highway 50.

Hanford Weather:

A storm system originating in western Canada will track southward and bring much cooler weather and a chance of rain showers and snow, especially at locations above 9000 feet today and Monday.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

A low pressure system will pass over Southern California today bringing cooler than normal conditions and light showers. There is a slight chance of a thunderstorm over the mountains. The chance of showers will linger into Monday. High pressure aloft will take over Wednesday into the weekend supporting a warming trend with gusty offshore winds possible towards the end of next week.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

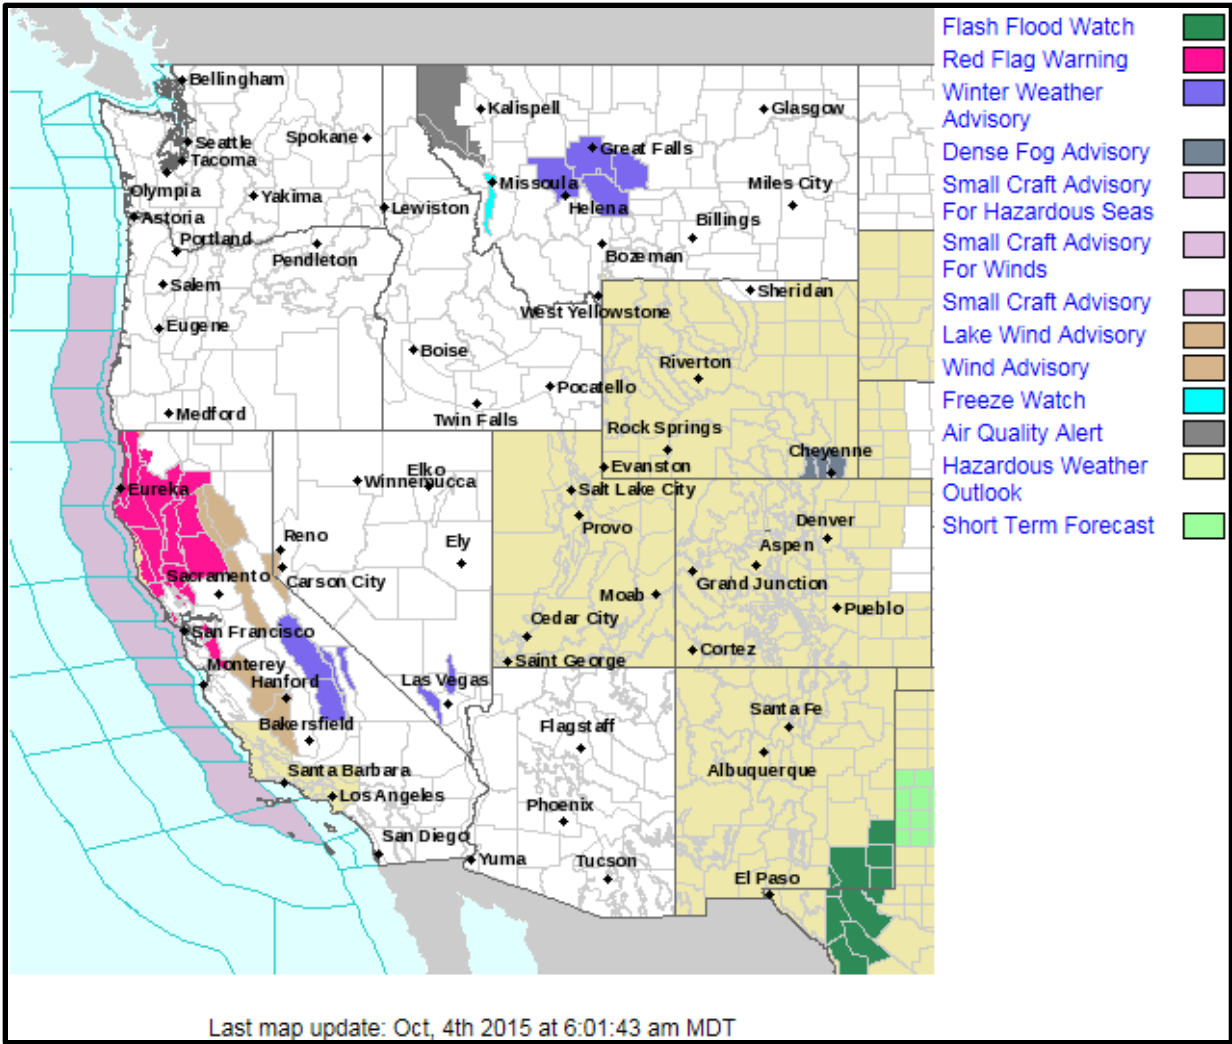

A low pressure system from the north will move into Southern California today, and then move slowly inland on Monday and Tuesday. This system will bring numerous showers today, with periods of showers continuing tonight and decreasing Monday. Dry with a warming trend for Wednesday into next weekend as high pressure over the subtropical eastern Pacific expands into California with well above average high temperatures by next weekend.

Southeast California Weather:

A strong and cold low pressure system from western Canada will develop over western states today and Monday. In response, gusty afternoon south winds are expected today with a slight chance of afternoon and evening thunderstorms. The best chance of showers and thunderstorms will occur Monday and Tuesday. Clearing skies are expected Wednesday with mostly clear skies and warmer temperatures toward the end of the week.
